

LOWER TULE RIVER IRRIGATION DISTRICT
Water Supply Notice 2003-1

To all Landowners and Waterusers:

April 16, 2003

In light of the recent storm activity and reservoir conditions at Millerton Lake the District may have water available beginning as early as Monday April 21st. The timing and duration of any run will depend on several variables and thus is hard to predict at this time. The best we can do is to tell you to look for water in the canals or if you would like to be notified when it is available please call the office and we will put you on the notification list.

Water made available during April could effect how much we have for this summer so you are encouraged to use water now should it become available. **The water rate has been set at \$35 per acre-foot.** That rate will remain in effect until further notice. We will keep you informed of any changes in the supply and/or rate. Please contact the District office for additional information (752-5050 or 686-4716). You can also check the website for regular updates: www.ltrid.org

A reminder that all water accounts must be current in order to receive water.

Daniel G. Vink
General Manager
