

May 19, 2023

The Board, at its May meeting, set the summer water rate at **\$100 per acre foot**. As long as Millerton Reservoir continues in Flood Control operations, the water is available for landowners to purchase and recharge for groundwater credits. In the coming months, the Board will also be identifying a block of water, recharged by the District, to potentially be made available for purchase by landowners where there is no District distribution system.

As always, the Board will be continue to monitor the available water supply and water rates on an ongoing basis.

As always if there are any questions please call the office.

Sincerely,

Eric Limas
General Manager
