

## August 11, 2023

Pixley 2023 Water Run update –

- Uncontrolled Season on the Friant System ended July 29.
- Pixley deliveries are now for Irrigation Demand only, with no more recharge water available.
- The Pixley water run is currently estimated to last until the end of August. That could fluctuate by a few days or so either way, depending on the level of irrigation demand and capacity in the Friant Kern Canal to bring the water in.
- There is potential, per long term agreements the District has with other Districts, that some water will become available in September and October to run.
- As always, we will continue to send out updates as things evolve.

As always if there are any questions please call the office.

Sincerely,

Eric Limas

General Manager
