

July 10, 2024

Update July 10,

The Class 1 allocation for the Friant contractors has been reduced from 100% to 90%, due to Millerton reservoir potentially getting to low point before all of the water contract year runoff hitting the reservoir. Due to this, and at current demands the water run will end around August 1 give or take a few days depending on what grower demand does.

We will continue to provide updates as we work our way through the remainder of the run.

Update July 5

Based on current demands and remaining supply, it appears that the end date of our run will be around August 5. This could change by a day or two shorter if demand goes up or longer if demand goes down. We will continue to send updates as the end of the run gets closer.

As always if there are any questions please call the office.

Sincerely,

Eric Limas

General Manager
