

LOWER TULE RIVER IRRIGATION DISTRICT
WATER SUPPLY NOTICE 2001 – 3
7/11/2001

TO: ALL LANDOWNERS AND WATER USERS

In order to maximize use of the water available we have decided to continue the split irrigation runs that will hopefully coincide with your irrigation schedules.

The current run will end July 18th with water being available to most turnouts through the 18th. Given the nature and size of our system a few turnouts may be off prior to the 18th and some may have water past the 18th. Please contact the Water Department for specific information.

Water to all parts of the system will resume on August 1st.

The August run will be the last run of the year and we intend to run out our remaining 2001 supply at that time. Given the declining supply that run is expected to last no more than 7 days. For more information please contact the District office. The water rate will remain at \$35 per acre-foot.

For updates on the water supply please check the District web site: www.ltrid.org. A reminder that you must have money on deposit and current Reclamation Law forms on file to receive water. Water orders can be placed by calling the District office at 686-4716 or 784-2598.
