

LOWER TULE RIVER IRRIGATION DISTRICT
WATER SUPPLY NOTICE 2001 – 3
6/11/2001

TO: ALL LANDOWNERS AND WATER USERS

In order to maximize use of the water available we have decided to have split irrigation runs that will hopefully coincide with your irrigation schedules.

The first run will end June 22ND with water being available to all turnouts through the 22ND. Water to all parts of the system will resume on July 9th. It is anticipated that the second run will last at least two weeks and possibly beyond that time depending upon available supply and user demand. It is the goal of the Board to have water through the 10th of August. In order to meet that goal we may shut off for 10-14 days in later July. For more information please contact the District office. The water rate will remain at \$35 per acre-foot.

For updates on the water supply please check the District web-site: www.ltrid.org. A reminder that you must have money on deposit and current Reclamation Law forms on file to receive water. Water orders can be placed by calling the District office at 686-4716 or 784-2598.
