

In light of the recent storm activity the District has commenced a flood release from Lake Success. The duration of this run will depend on several variables and thus is hard to predict at this time. At present, we plan on having water in parts of the system through January 22nd. We cannot deliver Tule River water to all canals so deliveries in some areas will be limited. To date, our snow pack is running approximately 200% of average so we are off to a good start.

Water made available during this run will not effect how much we have for this summer so you are encouraged to use water now should it become available. **The Board has set the winter rate at \$25 per acre-foot.** That rate will be reviewed again on or about March 1st, unless conditions dictate otherwise. We will keep you informed of any changes in the supply and/or rate. Please contact the District office for additional information (752-5050 or 686-4716). You can also check the website for regular updates: www.ltrid.org

A reminder that all water accounts must be current in order to receive water.
